Dual VET 4.0

STRENGTHENING SYSTEMS IN TUNISIA AND MOROCCO

November 2026

NEWSLETTER #2

Dual VET 4.0 presents needs analysis in Morocco and Tunisia

The second transnational meeting of the Dual VET 4.0 project took place on **15 October 2026 in Settat, Morocco**. During the meeting, partners from Morocco and Tunisia shared the key findings of their national needs assessments, based on focus groups, stakeholder surveys and desk research conducted over recent months. The findings provided valuable insights into the main challenges and opportunities facing Dual VET systems in both countries. Some findings are presented next.

Morocco: A survey involving 43 stakeholders identified weak cooperation between training institutions and enterprises (74.4%) as the main challenge facing Morocco's dual VET system. Other gaps include limited alignment with labour market needs, insufficient learner monitoring and inadequate digital tools. Priorities include stronger school–enterprise partnerships, improved digital skills and shared platforms for coordination, monitoring and assessment.

Tunisia: A needs assessment involving 27 stakeholders highlighted weak school–enterprise coordination, limited employer involvement in curriculum development and outdated training equipment. The lack of digital tools for monitoring work-based learning was identified as a major obstacle by 67% of institutional managers. Priorities include strengthening partnerships, introducing digital monitoring tools and improving professional development for trainers and in-company tutors.

Next step: recommendations

Building on the findings of the national needs assessments in Morocco and Tunisia, partners will now focus on developing the **Curriculum Design and Digital Learning Recommendations for Dual VET Systems in Tunisia and Morocco**, to be completed by February 2027.

This report will provide practical guidelines for curriculum development, digital tools integration, competence frameworks, innovative pedagogical methods, open educational resources and training pathways. It will support the modernisation of Dual VET systems in both countries, ensuring that future training approaches respond to identified needs and labour market demands.
